TOP DEVELOPER

EXPERIENCE

NASHVILLE SOFTWARE SCHOOL, Jan 2016 - Present

Apprentice Software Developer | Front-End & C# .NET

Full-stack web development bootcamp, actively managing and building group & individual projects.

- Application of OOP fundamentals utilizing ASP.NET MVC in Visual Studio and TDD
- Created single page applications with Angular & Javascript
- Used REST to interact with Firebase, external APIs, and custom SQL database API repositories.

Teaching Assistant | Front-End & Node.js

- Mentored students to maximize mastery of MEAN stack
- Evaluated & contributed to the course curriculum
- Lead instruction on topics including: SQL, ERD, Deployment

THEREALTOOTHFAIRIES.COM, Apr 2012 - July 2016

Project Manager

- Designed solutions to solve specific user problems
- Coordinated the design-to-deployment process for website features and full mobile applications

PROJECTS

Boogie And Brush

boogie-and-brush.firebaseio.com

github.com/morecallan/frontend-capstone

Designed a solution that would motivate children to brush their teeth. Built with Angular 1.5, carefully constructed UX with Sass, utilized Firebase multi-level authentication, and database interaction.

Robot Battledome

robot-battledome.firebaseio.com

github.com/morecallan/modern-js-quiz-morecallan

Originally assigned as a simple quiz to demonstrate mastery of prototypal inheritance in JS, this project took on a life of it's own. Utilizes custom JS utility functions, Browserify, JSON, and ES6 features to enhance functionality of assignment.
